

S&G® Model 2890 PDL Pedestrian Door Lock

Design Based on Federal Specification FF-L-2890

- Incorporating an S&G 2740 high security lock for an exceptional level of security in an easy-to-operate automatic door deadbolt device.
- For use on entry doors to SCIFs (Sensitive Compartmented Information Facilities) and other areas where sensitive information and activities need to be protected.
- Outside entry is via the familiar left-right-left dialing sequence of an S&G model 2740 lock.
- Surface mounted design reduces installation time and accommodates a wide variety of doors.
- Four different pinch-proof strike designs to securely cover virtually all applications.
- Inside turn knob provides for quick, easy exit.
- Battery powered design reduces entry time by eliminating the need to power up the lock.
- Designed to conform to the requirements of Federal Specification FF-L-2890.
- Single User and Dual Control modes of operation are selectable and changeable at any time.
- The 2890 PDL incorporates a blocking device that can be activated to prevent inadvertent locking of the deadbolt when the protected area is occupied. The blocking device can be activated and deactivated from inside either by turn-knob or key cylinder.

**Designed to the highest US Government
Security Standards for Pedestrian Door Locks**

Model 2890 PDL High Security Pedestrian Door Lock

Design Based on Federal Specification FF-L-2890

Advanced electromechanical access control. The S&G® 2890 PDL lock is engineered and manufactured to conform to the highest security standards of the US Government for the protection of sensitive materials.

Easy to install. The S&G® 2890 PDL incorporates a model 2740 high security combination lock, by far the easiest to install lock in its category. You'll save installation time and greatly reduce the probability of installer damage.

Four Rugged Strike Designs. S&G is the original designer of the strikes you commonly see on SCIFs and other government and defense contractor secure areas. These four models accommodate mounting the 2890 PDL on virtually any door and frame.

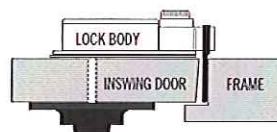

Spy-Proof® Dial. This security enhancing feature is standard with the S&G® 2890 PDL. It restricts the area of the dial that can be viewed to a small band of numbers at the very top, making it extremely difficult for anyone other than the operator to view the numbers being dialed.

Easy Operation. Even with its enhanced security features, the Model 2890 PDL is easy to operate. It uses the standard left-right-left dialing procedure for entry, and features an easy to operate inside turn knob for quick egress.

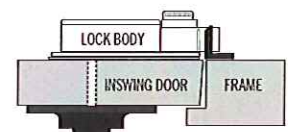

Rugged Construction. The time tested design and construction of the 2890 PDL makes this a robust and secure automatic deadbolt device.

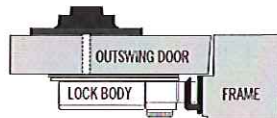

The support of the industry leader. S&G is one of the world's largest manufacturers of high security safe and vault locks, with one of the broadest arrays of locks available. Our safe locks are recognized as industry standards, unsurpassed in quality. We provide excellence in all areas—from our ISO 9001 and a wide variety of other worldwide certifications to our experienced customer service staff. We proudly stand behind all of our products with one of the best warranties in the industry.
